FLOWERING TREES

JAPANESE ROSEFLOWERING CHERRIES

—75,000 trees in all sizes up to 10 feet, a few varieties can be had in sizes up to 12 feet.

“AMANOAWA”—Up to 10 feet high. The only conical or pyramidal flowering tree, just right for formal effects.

“AVIUM FLORA PLENA”—8-10 feet high. The variety is one of the best, quick-growing flowering trees, perhaps exceeding “Yoshino” in growth, but not so showy when in bloom; very symmetrical.

“YOSHINO”—The *best* of the Cherries for shade trees and for lining an avenue or allé.

“AUTUMNALIS”—October flowering Japanese Cherry, 5 foot stem, 1 year head, with a spread of 18-24 inches. Lower stems can also be furnished. A Catalpa Bungei effect, but superior.

(SHIDARE-HIGAN ZAKURA) — “Standard form.” 5 foot stems.

“Pyramid form,” up to 10 feet high. Can be had comparatively slender as well as bushy specimens 8 ft. wide.

WOHLERT'S DOUBLE ROSEFLOWERING

WEeping CHERRY—*Standard form*, 2, 3 and 4-year-old heads on 3, 4 and 5 ft. stems. All transplanted Spring 1929.

FLOWERING CRAB—(*Malus*) can be had in bush, pyramid and standard forms. All sizes up to 10 feet high in practically our entire assortment, such as *Atrosanguinea*, *Arnoldiana*, *Florbunda Purpurea*, *Scheideckeri*, *Spectabilis*, *Bechtels*, *Micromalus*, *Eleyi*, etc.

MALUS SARGENTI—All sizes up to 6 ft. wide, 4 to 7 ft. high. If Sargentii is desired as a spreading type exclusively, the top growth must be removed for a year or two. After that they would retain the spreading habit. Scions direct from Arnold Arboretum.

MALUS THEIFERA—Up to 10 feet. Choice plants, the larger ones not in unlimited quantities.

FLOWERING PEACH—Our big collection of Flowering Peach may be worth your while inspecting while in bloom. They were collected by us during the Spring, 1929, from all over the United States and Europe.

MAGNOLIAS—Chinese Magnolias can be had in 6-8 ft. trees in fair quantity.

SOULANGEANA—Up to 6 ft. high in practically unlimited quantities.

GRANDIFLORA—Transplanted stock up to 4 ft. high, also potgrown in similar sizes.

PINK' DOGWOOD—(*Cornus Florida Rubra*)—Specimens 3 to 8 ft. high.

WHITE DOGWOOD—(*Cornus Florida*)—Specimens 3 to 8 ft. high.

DOUBLE-WHITE FLOWERING DOGWOOD—(*Cornus Florida Plena*)—Up to 8 ft., gardenia-like flowers.

JAPANESE DOGWOOD—(*Cornus Kousa*)—Up to 9 ft. high, bushy plants, transplanted Spring, 1929.

MAY DAY TREE—(*Prunus Padas Commutata*)—Up to 8 ft. high, transplanted Spring, 1929, well furnished trees with good root system. The trees are not so well grown nor so regular in outline as our Flowering Cherries.

FLOWERING TREES, COLUMNAR

FLOWERING CHERRY "AMANOGAWA"—Up to 10 ft. high.

ORNAMENTAL TREES

CUT-LEAF WEEPING BIRCH—Up to 12 ft. high.

GINGKO—Pyramidal form up to 5" caliper. These trees are grown in single rows and are well developed, having well-rounded columnar crowns.

MOUNTAIN ASH—Up to 16 feet (2¼" cal.). Light and heavy stock. Head begins 4 feet from the ground. Well spaced for even development.

LOMBARDY POPLARS—Up to 24 ft. high, 4-6 inch caliper; younger trees, too.

BALD CYPRESS—A few nice trees, 12 ft. high.

ORNAMENTAL TREES AND SHRUBS WITH SHOWY RED FRUIT

EUONYMOUS ALATUS—Specimen plants 7-8 ft. high and wide.

ENGLISH HOLLY—Potgrown up to 24 inches high, also fruit-bearing plants up to 4 feet high. A few 5 feet.

ILEX SEIBOLDI — (Japanese Winterberry) — Bushy, 5 years old, 3 to 5 feet high.

FRUITING THORN—A few up to 12 feet high in assortment; supply limited.

SHADE TREES

ORIENTAL PLANES—Up to 3½" caliper.

NORWAY MAPLES—In quantity up to 2½" caliper—mostly 1½-2". The trunks are quite straight. These trees were grown in Washington and Oregon up to 8 ft. high whips, then developed in our nurseries to a salable size.

SILVER MAPLES—2 to 3" caliper, pruned and cut back during Spring, 1929.

EUROPEAN LARCH—Up to 16 feet high, lower branches have been removed up to 4 feet from ground; well branched; perfect heads.

RED FOLIAGE TREES AND BUSHES

JAPANESE RED-LEAF MAPLES—Fieldgrown and from pots up to 30 inches high.

PRUNUS NEWPORT — (Flowering Plum) — With a more intense color than the Japanese Maple, 6 ft. high, well branched, but not heavy.

RED-LEAF BARBERRY—Up to 4 ft. high, 3-4 ft. wide. Specimen plants.

PRUNUS CISTENA—(Red-leaf Sand Cherry)
—Very brilliant.

EVERGREENS

TAXUS CUSPIDATA—Spreading, bushy plants up to 6 feet wide.

CUSPIDATA CAPITATA—Up to 6 ft. high. Can also furnish a few specimens up to 10 ft. high, well sheared and bushy; a limited supply.

BREVIFOLIA—Up to 36 inches wide, transplanted 1928 and 1929.

BACCATA HIBERNICA—A few up to 4 feet.

PINUS NIGRA—(Austrian Pine)—All sizes up to 8 feet high; a large quantity up to 4 feet at attractive prices; plenty trees at 6 feet.

SYLVESTRIS—(Scotch Pine)—Up to 5 feet; not a large supply.

STROBUS—(White Pine)—Up to 8-10 feet high.

MUGHUS—(Mugho Pine)—Up to 30 inches wide.

THUNBERGI—(Japanese Black Pine)—Up to 4 feet high.

SIBERIAN ARBORVITAE—Up to 3 feet.

GLOBE ARBORVITAE—In all sizes up to 3 feet.

CAROLINA HEMLOCK—A few trees 6-7 feet.

CRYPTOMERIA JAPONICA LOBBI COMPACTA—All sizes up to 8 feet high.

RETINOSPORA OBTUSA GRACILIS—Up to 7 feet high, perfect stock.

SHEARED RETINOSPORA—In assortment up to 8 feet.

BUXUS SUFFRUTICOSA—(Dwarf Boxwood)
—Up to 18 inches high. Very bushy, transplanted stock; well spaced in the rows.

NORWAY SPRUCE—Up to 8 feet.

HEMLOCK SPRUCE—Up to 10 feet high.
Transplanted Spring, 1928, sheared annually.

JUNIPER PFITZERIANA—6 ft. wide, and all other sizes, too.

BLUE SPRUCE SEEDLINGS—Up to 36 inches. To be sold at low price to reduce our stock.

CEDRUS DEODORA—Up to 6 feet high, very symmetrical and bushy. The most graceful evergreen aside from Hemlock Spruce. Hardy in Philadelphia and South.

PYRAMIDAL OR COLUMNAR EVERGREENS

AMERICAN ARBORVITAE—(*Thuya Occidentalis*)—8 feet high, well spaced in nursery rows, transplanted stock. Perfect specimens that please.

PYRAMIDAL ARBORVITAE—(*Thuya Occidentalis Pyramidalis*)—Up to 8 feet high.

ROLLINSON'S GOLDEN ARBORVITAE—(*Thuya Orientalis Elegantissima*)—Up to 8 feet high. Perfect symmetrical plants. This variety does not materially change its color in the winter. It is a beautiful green all year round. Single stem, to a tapering perfect spire.

JUNIPER VIRGINIA GLAUCA—(Silver Redcedar)—Up to 8 feet high, and other grafted varieties of similar height.

JUNIPER KETELERI, CANARTI, ETC.—Up to 8 feet high.

JUNIPER CHINENSIS COLUMNARIS—8 ft. high, transplanted 1929.

BROAD LEAF EVERGREENS

KALMIA — (Mountain Laurel) — Nurserygrown, up to 24-30 inches high, perfect foliage, broad, bushy plants.

RHODODENDRON MAXIMUM — Specimen plants, up to 8 feet high, well rounded and bushy, nursery grown, good green foliage.

PYRACANTHUS LALANDI AND COCCINEA—Potgrown up to 30 inches high, 6" pots, very bushy.

AZALEA HINODEGIRI—Up to 24 inches wide.
AMOENA—A great quantity 24-30 inches wide,
and many specimen plants up to 5 feet wide.
INDICA ALBA—Up to 4 feet wide, mostly 24
inches high.
SCHLIPPENBACHI — (Deciduous) — Well
branched, transplanted annually.

SHRUBBERY

VIBURNUM CARLESI—All very bushy plants,
36 inches high. Old imported stock plants 4-5
feet high. Plenty of stock ready for you.

FORSYTHIA PRIMULINUS—4 feet high, 6-8
branches or more.

DEUTZIA GRACILIS—6 years old.

DEUTZIA LEMONINI—Choice stock.

SYRINGA VULGARIS—Purple, bushy, 5 feet
high, planted 6 feet apart in nursery row.

MOCKORANGE and other Flowering Shrubs, 6-8
feet high and well branched.

HEDGE PLANTS

PRIVET—Specimen plants, can be furnished in
bushy, sheared plants in ball shape, pyramidal,
conical and bush form, up to 8 feet high. Just
right for screens and instantaneous hedges.

STANDARD PRIVET — Sheared plants, trunks
up to 4 feet high. Specify height of trunk de-
sired. Very low price to quantity buyers.

GOLDEN PRIVET—Bush form or sheared, all
sizes up to 6 feet, in great quantities up to 5 feet.

GROUND COVER PLANTS

PACHYSANDRA TERMINALIS — (Japanese
Spurge)—In hundred thousand lots.

AJUGA REPTANS—A good supply always.

VINCA MINOR—(Periwinkle).

PERENNIALS

PEONIES — Modern varieties, flowering - size clumps.

TREE PEONIES—That will bloom, large bushes, as measured while in foliage: 42 inches wide.

IRIS—All in modern Pallida varieties at low prices, also the popular standard sorts.

PERENNIALS—A general line, including Hemerocalis in assortment.

FRUITING TREES

CHERRIES—A limited assortment, 8 ft. high, transplanted 1929.

APRICOT—"Moorpack," bushy, 8 feet high, measured while in foliage 4 to 6 feet wide.
